

ROBOTIC SURGERY, **THEN, NOW, AND BEYOND**

AN EVIDENCE-BASED FUTURE FOR
ROBOTIC ASSISTED SURGERY

Presented by

Supported by

Join other world-leading experts in surgery where we will shine a light on the future of robotic surgery around the world. This global event will look at important topics including the great debate; robotics vs manual laparoscopic surgery. Have your say on the future of training, the importance of safety in medical devices and how technology can build a more equal surgical workforce.
